| Conjugation                | Cy3                                                                                                                                                                                                                                                           |
| Product Description        | Alkaline phosphatase (ALP) removes phosphate groups from the 5 end of DNA and RNA, and from proteins, at high pH. Most mammals have 4 different isozymes: placental, placental like, intestinal and non tissue specific (found in liver, kidney and bone).... |
| Clonality                  | Polyclonal                                                                                                                                                                                                                                                    |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                        |
