| Product Description        | Yellow fluorescent protein (YFP) is a genetic mutant of green fluorescent protein (GFP) originally derived from the jellyfish <i>Aequorea victoria</i> . Its excitation peak is 514 nm and its emission peak is 527 nm. Like the parent GFP, YFP is a useful tool ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                            |
| Concentration              | 1ug/ul                                                                                                                                                                                                                                                                |
| Clone Designation          | [1H9]                                                                                                                                                                                                                                                                 |
| Buffer                     | Aqueous buffered solution containing 0.01M TBS (pH 7.4) with 1% BSA, 0.02% Proclin300 and 50% Glycerol.                                                                                                                                                               |
