| Conjugation                | PE/Cy5                                                                                                                                                                                                                                                        |
| Product Description        | Possesses single-stranded DNA-stimulated ATPase and ATP-dependent DNA helicase (5 to 3) activity, hexamerization is thought to be critical for ATP hydrolysis and adjacent subunits in the ring-like structure contribute to the ATPase activity.Component... |
| Clonality                  | Recombinant                                                                                                                                                                                                                                                   |
| Concentration              | Lot dependent                                                                                                                                                                                                                                                 |
