| Category                   | Molekularbiologie                                                                                                                                                                                                                               |
| Product Description        | This is an pre-made gene silencing adenovirus that expresses a shRNA to knockdown Sus scrofa GNAS gene. The shRNA expression is driven by an U6 promoter.The knockdown of this Sus scrofa gene was validated by western blot in IPI21 cells.... |
| Concentration              | 1x10 <sup>10</sup> PFU/ml                                                                                                                                                                                                                       |
| Buffer                     | DMEM, 2% BSA, 2.5% Glycerol                                                                                                                                                                                                                     |
