CheKine(TM) Reactive Oxygen Species (ROS) Detection Fluorometric Assay Kit ASC-KTB1910

Article Name	CheKine(TM) Reactive Oxygen Species (ROS) Detection Fluorometric Assay Kit
Biozol Catalog Number	ASC-KTB1910
Supplier Catalog Number	KTB1910
Alternative Catalog Number	ASC-KTB1910-50, ASC-KTB1910-100
Manufacturer	Abbkine Scientific
Category	Kits/Assays
Product Description	CheKine(TM) Reactive Oxygen Species (ROS) Detection Assay Kit provides a simple, sensitive, rapid ROS detection method. ROS detection is based on the fluorescent probe DCFH-DA
Tag	Reactive Oxygen Species ,ROS
Application Notes	CheKine(TM) Reactive Oxygen Species (ROS) Detection Assay Kit provides a simple, sensitive, rapid ROS detection method. ROS detection is based on the fluorescent probe DCFH-DA . DCFH-DA is a cell-permeable sensitive probe used to detect intracellular reactive oxygen species (ROS). This probe could be hydrolyzed into DCFH by esterase in the cell while passing through the living cell membrane. DCFH is no fluorescence and cannot transmit the cell membrane, which then can be could be oxidated by ROS and produce the fluorescent DCF. Then the fluorescent could be detect by flow cytometry or fluorescence microscopy , and according which the level of cellular reactive oxygen species can be analyzed.
