Application Notes	Citreoviridin is a mycotoxin produced by <i>Penicillium</i> and <i>Aspergillus</i> species. ¹ It is an inhibitor of both the mitochondrial ($K_i = 4.5 \mu\text{M}$) ² and ectopic ATPase ³ and selectively suppresses the growth and proliferation of lung cancer cells without affecting normal cells ³ . It induces liver fibrosis in mice ⁴ and induces autophagy-dependent apoptosis through the lysosomal-mitochondria axis in human liver cells ⁵ . Low concentrations of citreoviridin prevent both calcium deposition in vascular smooth muscle cells and osteoclast activation in vitro. ⁶
