| Category                   | Biochemikalien                                                                                                                                                                                                                                                |
| Product Description        | CHIKV-IN-3 is a potent inhibitor effective against two low-passage CHIKV strains, with EC50 values of 1.55 µM for CHIKV-122508 and 0.14 µM for CHIKV-6708, respectively. It targets host cells to disrupt viral replication while maintaining minimal cyto... |
| Molecular Weight           | 383.95                                                                                                                                                                                                                                                        |
| Formula                    | C24H30ClNO                                                                                                                                                                                                                                                    |
| Target                     | DNA/RNA Synthesis                                                                                                                                                                                                                                             |
