| Category                   | Kits/Assays                                                                                                                                                                                                                                                   |
| Product Description        | Superoxide Anion Scavenging Capacity is widely used as a readout in redox biology to assess oxidative stress, antioxidant capacity, and the impact of ROS/RNS on cellular damage and signaling. This microplate-based assay kit supports quantitative meas... |
| Samples                    | Serum, Plasma, Cell Culture Supernatant and other biological samples.                                                                                                                                                                                         |
