| Product Description        | (alphaS)-alpha-Hydrazinyl-3,4-dihydroxy-alpha-methylbenzenepropanoic Acid Ethyl Ester is an potential dopa ester decarboxylase inhibitors for treating neurological or movement diseases or disorders. Molecular Formula: C <sub>12</sub> H <sub>18</sub> N <sub>2</sub> O <sub>4</sub> Solubility: Methanol ... |
| Molecular Weight           | 254.28                                                                                                                                                                                                                                                                                                           |
| Form                       | Supplied as a Orange Solid                                                                                                                                                                                                                                                                                       |
| CAS Number                 | [1458640-32-8]                                                                                                                                                                                                                                                                                                   |
