| Application                | ELISA                                                                                                                                                                                                                                                         |
| Species Reactivity         | Mouse                                                                                                                                                                                                                                                         |
| Product Description        | This assay employs an antibody specific for Anti-mouse IL-23 coated on a 96-well plate. Standards and samples are pipetted into the wells and IL-23 present in a sample is bound to the wells by the immobilized antibody. The wells are washed and biotin... |
| Application Dilute         | This immunoassay kit allows for the in vitro quantitative determination of Mouse IL-23 concentrations in serum, plasma and other biological fluids. Detection Range: 15.6- 1000 pg/ml Sensitivity: < 9.4 pg / ml                                              |
