| Category                   | Proteine/Peptide                                                                                                                                                                                                                                              |
| Product Description        | Source : Human Cells,Matrix metalloproteinases are a family of zinc and calcium dependent endopeptidases with the combined ability to degrade all the components of the extracellular matrix. MMP-9 (gelatinase B) can degrade a broad range of substrates... |
| Antibody Type              | Recombinant Antibody                                                                                                                                                                                                                                          |
