| Category                   | Kits/Assays                                                                                                                                                                                                                                          |
| Product Description        | Quantify intracellular active chymotrypsin-like serine protease activity in vitro. The CMK group alkylates the active site histidine residue. Analyze your samples using a flow cytometer, fluorescence microscope, or fluorescence plate reader.... |
| Target                     | Chymotrypsin-like enzymes                                                                                                                                                                                                                            |
