| Manufacturer               | ImmunoChemistry Technologies                                                                                                                                                                                                                      |
| Category                   | Kits/Assays                                                                                                                                                                                                                                       |
| Product Description        | This in vitro assay employs the green fluorescent inhibitor probe FAM-DEVD-FMK to label active caspase 3 and caspase 7 enzymes in living cells. Analyze samples using fluorescence microscopy, a fluorescence plate reader, or flow cytometry.... |
| Target                     | Caspase-3/7                                                                                                                                                                                                                                       |
