| Product Description        | The clone 3G8, a mouse monoclonal antibody, binds to the 50-65 kDa transmembrane protein of IgG Fcγ <sub>3</sub> known as CD16, a surface antigen commonly associated with human NK cells. In addition to surface expression on NK cells, CD16 is expressed on ... |
| Clonality                  | Monoclonal                                                                                                                                                                                                                                                         |
| Clone Designation          | [3G8]                                                                                                                                                                                                                                                              |
| Isotype                    | IgG1, k                                                                                                                                                                                                                                                            |
| NCBI                       | <a href="#">2214</a>                                                                                                                                                                                                                                               |
